What is your definition of an entrepreneur?

Sashin: An entrepreneur is an individual who sees a gap in the market and executes on the idea. Entrepreneurs are risk takers, they have 0 emotional attachment to failure or peoples opinions. Wayne Gretzky says, "100% of the shots never taken, never goes in." Entrepreneurs also understand success is delayed gratification, what you saw today you will only reap in a few years. Most people expect to put success in the microwave, push 60 seconds and manifest it. Life isn't that easy or else

Building a dynasty

Sashin Govender is one of Africa's youngest dollar millionaires, a business mogul, motivational speaker, mentor and founder of The Millionaire Student. Here he talks self-development, mentorship and winning in life.

“I'd rather be celebrated for the success stories I've created and how many lives I've impacted instead of my net worth.”

GO: What does it mean to be one of the youngest dollar millionaires in Africa?
SG: It's exciting, but I'm not really looking for that. I'm just looking to build a business that can help people and create jobs. I'm not really interested in the money part of it.

GO: What do you think holds people back from success?
SG: I think it's a lack of vision and a lack of commitment. People want to be successful but they don't want to put in the hard work and sacrifice that it takes to get there.
